**Subject:** RE: [EXTERNAL] RE: 5-year Remedy Review Milestone Discussion

Hi Chris,

There are a few different metrics: FYR Protectiveness (both current and future), Groundwater Migration Under Control, Human Exposure Under Control.

During the last FYR Issues raised at the site were found to affect Future Protectiveness but not Current Protectiveness. Because of a lack of VI data the Protectiveness Determination was deferred.

GMUC cannot be claimed until the relevant FYR Issues are resolved. I believe this is the same with HEUC and the VI related FYR Issues.

Daewon

Great! Sounds like we are on the correct path for the VI project. I think we only need Wednesday for the Technical meeting this time. Unless you have additional topics to discuss, we just have Area 40 FS/RAP and the 5-year remedy review milestone discussion. The morning can be used for Groundwater topics and we can discuss these two topics in the afternoon.

Hi, Chris.

Daewon can speak for the groundwater issues, but for the VI issues we need a comprehensive VI evaluation report, which you've committed to delivering by the end of March. We're looking for this report to include missing building and HVAC data we've requested, sampling results and analysis, interpretation of results and pathways/source areas causing

VI, implemented/proposed mitigation measures, remediation plans to address impacted areas, revised tiering structure, and a long term O&M and sampling plan for site buildings-- revised to reflect facility closure plans. I've been able to extend our deferred protectiveness determination for VI again to allow for receipt of this report at the end of March, and time to review and revise/finalize it as necessary.

I've reserved 21 and 22 March to be on site at Aerojet as needed for meetings, and am happy to discuss anytime those days. However, we won't yet have the VI report by then. I won't bring Dan and Matt to meetings until we can receive and review the VI report; we can set up a meeting with all of us after that.

Thanks,  
Lynn

**Subject:** 5-year Remedy Review Milestone Discussion

Hi Daewon and Lynn – During our meeting on Monday, Enrique mentioned that EPA was not able to make a protectiveness determination based upon the progress made toward the recommendations in the 5-year remedy review. AR would like to help EPA reach the determination that the remedy implemented at the site is protective. I would like to include this topic on our agenda for March 21. If you are open to this help, please let me know what EPA needs in order to make this protectiveness determination and we can discuss how the team can meet these needs. Thanks, Chris
